Join our growing team in the position of:

Service Installer/Technician

Are you a self-motivated, well organized individual looking to advance your career? We are looking for someone who has strong leadership skills, is able to solve problems independently while demonstrating a strong sense of integrity.

This position requires a responsible person who can install water treatment equipment, troubleshoot problems, work through the issue and complete the work needed with a minimum of supervision on commercial and residential sites. Paperwork is required and must be completed with each job.

Are you a plumber that is tired of working on the dark side? Would rather work with white water, rather than black water and in a warm mechanical room instead of under a trailer in the winter? We need you.

Requirements:

- ~ Plumbing knowledge is considered an asset.
- ~ A Smart Phone and basic tools.
- ~ Valid Driver's License with a clean driving record
- ~ The availability to work out of town, occasionally.

On the job training will be provided to the successful candidate.
